

INTRODUCING OUR NEWEST TOOL, LINKER™ DEVELOPER EDITION.

Using our developer API, create endless possibilities in accessing data from Walmart's Retail Link website.

FEATURES

- ▶ Built with Microsoft .Net Framework 4.5 (to be released on 4.6 upon RTM)
- ▶ Access an unlimited number of Retail Link accounts from one computer for one price
- ▶ Asynchronous and Parallel programming allows for multiple downloads for multiple users at once
- ▶ Includes multiple console applications for automation in Task Scheduler or one-time usage
- ▶ To include an optional web management portal (release date TBD)
- ▶ **FIRST TO DELIVER** Delivery Window report / MABD (Must Arrive By Date) data
- ▶ **FIRST TO DELIVER** Supplier View In Stock Tool (SVIST) data

CONSOLE APPLICATIONS PROVIDED

- ▶ Download Done reports and Resubmit erred reports
- ▶ Submit reports and resubmit erred reports
- ▶ List a users' report status
- ▶ Download Delivery Window data
- ▶ Download SVIST data

CONSOLE APPLICATION FEATURES

- ▶ Utilize tokens and string matching like "harvest*" to match all reports that begin with "harvest" on all console applications
- ▶ Utilize replaceable tokens for dates and usernames when saving data to filenames and file paths, including Walmart dates and fuzzy dates

SUMMARY OF API CALLS PROVIDED

- ▶ Retrieve a list of saved reports
- ▶ Retrieve a list of report statuses
- ▶ Submit any saved report
- ▶ Delete a report from the status screen
- ▶ Download any Done or already Retrieved report
- ▶ Submit multiple reports all at once
- ▶ Resubmit erred reports
- ▶ Unzip reports
- ▶ List of all reports and their status
- ▶ Strongly typed object data for Delivery Window & SVIST data
- ▶ Calculate Walmart week for any given date
- ▶ Calculate Last Year's Walmart week factoring in years with 53 weeks
- ▶ Download without marking a report as Retrieved
- ▶ Move a saved report to a different folder
- ▶ Empty the Recycle bin
- ▶ Get a user's profile information
- ▶ Event handlers that provide real time information
